Communicate your corporate goals and objectives to the academic, biotechnology and pharmaceutical community.

www.hum-molgen.org

HUM-MOLGEN is one of the world's largest Internet sources of information for the latest in human molecular genetics. Our service consists of a vertical portal site and an associated mailing list.

Address the people responsible for making future investment decisions:

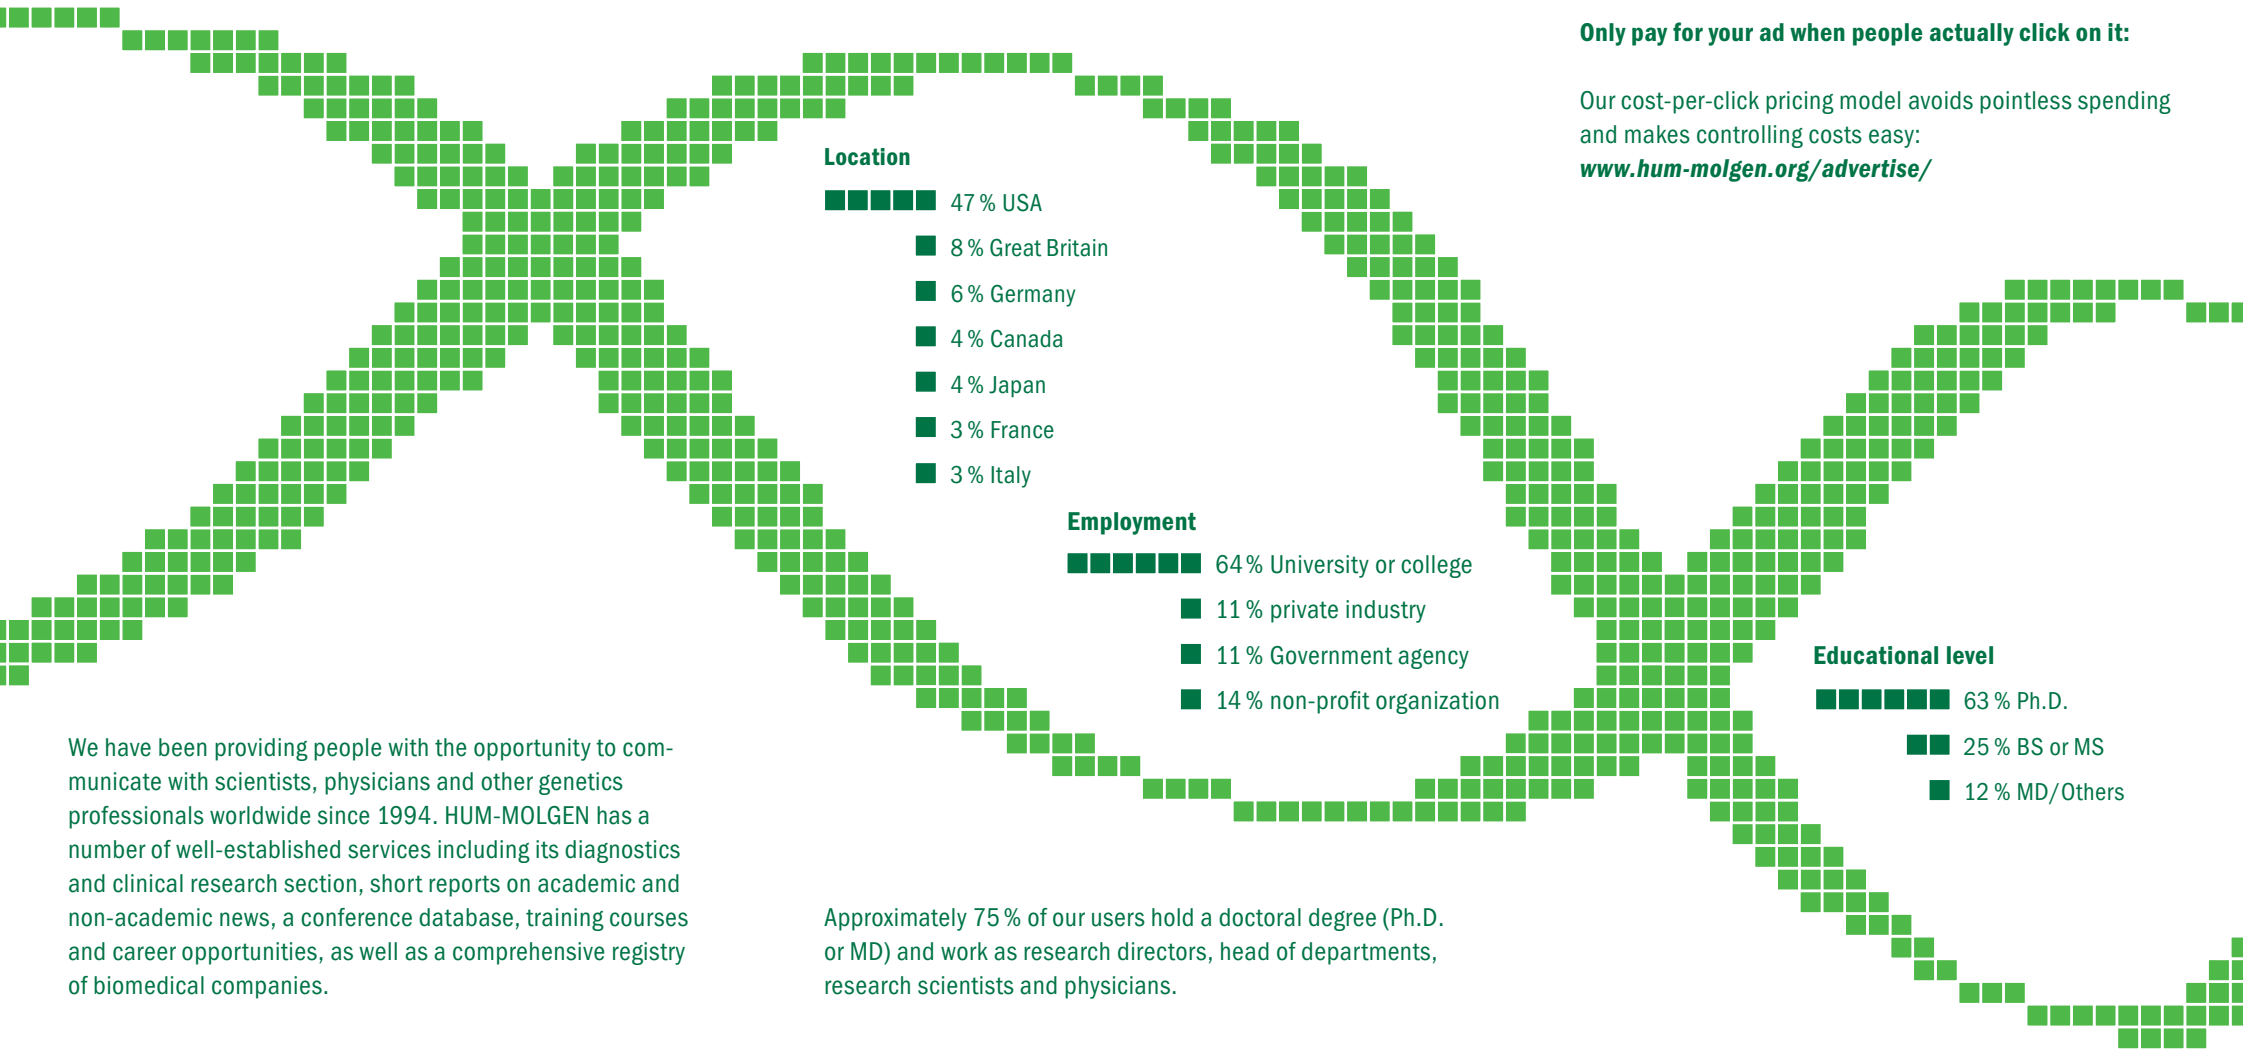

HUM-MOLGEN gives you the opportunity to contact an open-minded global audience of people interested in molecular biological technologies, bioinformatic solutions and diagnostic tools.

Target your banner advert to the country of your choice:

Run banner advertisements at selected sections using different formats (468 x 60, 150 x 300). Via our geographic region identification software HUM-MOLGEN shows your ad in the right place of the earth.

Only pay for your ad when people actually click on it:

Our cost-per-click pricing model avoids pointless spending and makes controlling costs easy:

We have been providing people with the opportunity to communicate with scientists, physicians and other genetics professionals worldwide since 1994. HUM-MOLGEN has a number of well-established services including its diagnostics and clinical research section, short reports on academic and non-academic news, a conference database, training courses and career opportunities, as well as a comprehensive registry of biomedical companies.

Approximately 75 % of our users hold a doctoral degree (Ph.D. or MD) and work as research directors, head of departments, research scientists and physicians.
